Mela Completed Points 23- feb-2016 --

1) Add all informations about invoice address: necessary for fee payment per each service sold by website or each service booked and after paid to the office of professional.
We have fee per service paid online or per service booked online but paid to the office. The amount will be given to the professional the day of the appointment, same for the fee, will be keeped the day of the appointment. In case of appointment just booked, the fee will be keeped from the paypal account of the professional.
Inserire dati per fatturazione. La fatturazione viene fatta per ;
le fee trattenute per ogni servizio pagato online, e quindi trattenute direttamente sul totale del pagamento del cliente.
le fee per prenotazione e pagamento in sede del professionista che vengono prese dal conto paypal, o altro, del
professionista.
When the user book and pay the appointment we have to keep the full amount of the price and keep untill the day and the time of the appointment. At the time we will keep the fee and release the rest of the amount to the professional.
In the period that we are keeping the money, the user can delete the amount untill 24 hrs before the date and time of the appointment, when the user cancel the appointment we have to return the full amount to the user.
Es: Servizio pagato online, la fee è 1,00, Servizio solo prenotato online, la fee è 2,00. Nel primo caso la fee viene presa
dal totale del cliente che ha pagato online e quindi si invia la professionista l'intera somma, meno la fee. Nel secondo
caso le fee viene trattenuta dal conto paypal, o altro, del professionista. Entrambi i pagamenti di Servizio e di Fee
verranno effettuati il giorno e l'ora della prenotaizone.
Il denaro viene trattenuto anche per il caso di cancellazione della prenotazione. La somma viene restituita all'utente.
The "Invoice Management" section is done and working, but need to check togethere with you, frmo the beginnig with a paypal test. I mean to book, pay and get the invoices. Email Invoice to the user and to the Professional.

2) Delete the appointment untill 1 day before.
Working but need to clarify:

3) Add maximum 5 office validation
Working

4) Add a new no.2 fields on the Office management: 1:"Address Area" this field will be used in front end of service page like an office address. 2: Telephone number, once user booked, it will be send the full address included the phone number of the office where the user booked. In the confirmation email for booked appointment add all contact details of the Professional.
Inserire 2 nuovi campi: Zona dell'ufficio: 1"Inserire la zona per aiutare i cliente a capire dove si trova il tuo ufficio"2
numero di telefono dell'ufficio. Inserire tutte le informazioni riguardanti indirizzi e contatti del professionista.
Fields are done, but for the country can we use the dropdown that we are using in the registration form?
Maybe we need to change the positions.

5) Add a Field : new option in the Service Management: Free Service, if is on don't show on the price fields. Display in the filters box and also in the Search Box on the home page.
Inserire nel back-end il "Servizio Gratuito" , se on non visualizzare il prezzo, inserirlo anche nel fornt-end nei filtri di
ricerca. Servizio gratuito.
Working, but need to do filters and add the check box "Free Service"

6) Add a new field near to Km range add also : "Down town" " in the province" " in the region" "in the country"
Those field display in the front-end when is selected the "Offisite Available Service"
When select Km range> display the field for fill the max km range.
Working, but need to show in front-end

7) Duration of the service: Only a text to be displayed, if the field in the back-end of the page is empty don't show anything in the front end, even the text
"Duration of service".
Working

8) Add a new field : Price per service offsite. Need to be clarify.
We'll add a new field, but at the end. is an extra payment, work like this.
Professionals new field in back-end : "Price additional for offsite service:" Ex: €20,00
In front-end: Display below the price, the thext: "For offiste service: €20,00" in this case 20 euro.
When user book offiste, in the popup window, at the payment we'll add the field with the extra payment and the ammount will be the total plus the extra.

9) Add new page for post request on front-end
Working, but need to finish, all fields need to be required except the "file"

10) fix front end service details page issue for free services.
Working
11) complete all service management & office management issues
Not jet completed.
